Örnek Cevap:

Social media has got huge importance these days. With the help of it the information, ideas, knowledge, cultures, philosophies, etc are flowing freely from one part of world to another. It has greatly impacted our lives. It has both the good and the bad impacts for human being.

Social media has a lot of advantages in our every walk of life. It has social, political, economic and educational impacts in our lives. Firstly, social media applications have made communication easy and cheap between friends, family and businesses. Secondly, with the help of social media people can reach the information quickly. Finally, it creates its own world, and this brings new job definitions and oppurtunities to people.

While these benefits are important, there are also important disadvantages. For example, many people spend too much time on social media, and this stops them from doing other useful activities like studying or reading. Therefore, sometimes it could be considered as waste of time. Additionally, overuse of social media can also cause some social problems. Clearly, using social media applications all the time stops you from interacting face-to-face with other people.

To sum up, I think social media is very useful. However, it can also cause a lot of problems, so we should use it carefully.
